

537.211 or a water right certificate under ORS 537.250:

(a) Emergency fire-fighting uses;

(b) Nonemergency fire-fighting training, provided:

(A) The source of the water is existing storage and the use occurs with permission of the owner of the stored water; or

(B) If the source of water is other than existing storage, the use occurs with the prior written approval of the watermaster in the district where the training will take place and subject to any conditions the watermaster determines are necessary to prevent injury to existing water rights and to protect in-stream resources;

(c) Water uses that divert water to water tanks or troughs from a reservoir for a use allowed under an existing water right permit or certificate for the reservoir;

(d) Fish screens, fishways and fish bypass structures, as exempted by rule of the Water Resources Commission;

(e) Land management practices intended to save soil and improve water quality by temporarily impeding or changing the natural flow of diffuse surface water across agricultural lands when storage of public waters is not an intended purpose. Such practices include but are not limited to:

(A) Terraces;

(B) Dikes;

(C) Retention dams and other temporary impoundments; and

(D) Agronomic practices designed to improve water quality and control surface runoff to prevent erosion, such as ripping, pitting, rough tillage and cross slope farming;

(f) Livestock watering operations that comply with the requirements under subsections (2) and (3) of this section;

(g) Forest management activities that require the use of water in conjunction with mixing pesticides as defined in ORS 634.006, or in slash burning;

(h) The collection of precipitation water from an artificial impervious surface and the use of such water;

(i) Land application of ground water so long as the ground water:

(A) Has first been appropriated and used under a permit or certificate issued under ORS 537.625 or 537.630 for a water right issued for industrial purposes or a water right authorizing use of water for confined animal feeding purposes;

(B) Is reused for irrigation purposes and the period of irrigation is a period during

which the reused water has never been discharged to the waters of the state; and

(C) Is applied pursuant to a permit issued by the Department of Environmental Quality or the State Department of Agriculture under either ORS 468B.050 to construct and operate a disposal system or ORS 468B.215 to operate a confined animal feeding operation; and

(j) Surface mining practices that result in the removal of water from a surface mine subject to an operating permit or reclamation plan approved by the State Department of Geology and Mineral Industries, unless the water is used for a subsequent beneficial use.

(2) The use of surface water for livestock watering may be exempted under subsection (1) of this section if:

(a) The water is diverted from a stream or other surface water source to a trough or tank through an enclosed water delivery system;

(b) The delivery system either is equipped with an automatic shutoff or flow control mechanism or includes a means for returning water to the surface water source through an enclosed delivery system; and

(c) The operation is located on land from which the livestock would otherwise have legal access to both the use and source of the surface water source.

(3) If the diversion system described in subsection (2) of this section is located within or above a scenic waterway, the amount of water that may be used without a water right is limited to one-tenth of one cubic foot per second per 1,000 head of livestock. Nothing in this section shall prevent the Water Resources Commission from approving an application for a water right permit for a delivery system not qualifying under subsection (2) of this section.

(4) The Water Resources Department, in conjunction with local soil and water conservation districts, the Oregon State University Extension Service, the State Department of Agriculture and the State Department of Fish and Wildlife and any other organization interested in participating, shall develop and implement a voluntary educational program on livestock management techniques designed to keep livestock away from streams and riparian areas.

(5) To qualify for an exempt use under subsection (1)(g) of this section, the user shall:

(a) Submit notice of the proposed use, including the identification of the proposed water source, to the Water Resources Department and to the State Department of
